

Fair Processing Notice (Privacy Notice)

Your Personal Information – what you need to know

Your information, what you need to know

This privacy notice explains why we collect information about you, how that information will be used, how we keep it safe and confidential and what your rights are in relation to this.

Why we collect information about you

Health care professionals who provide you with care are required by law to maintain records about your health and any treatment or care you have received. These records help to provide you with the best possible healthcare and help us to protect your safety.

We collect and hold data for the purpose of providing healthcare services to our patients and running our organisation which includes monitoring the quality of care that we provide. In carrying out this role we will collect information about you which helps us respond to your queries or secure specialist services. We will keep your information in written form and/or in digital form. The records will include basic details about you, such as your name and address. They will also contain more sensitive information about your health and also information such as outcomes of needs assessments.

Our Commitment to Data Privacy and Confidentiality Issues

As a GP practice, all of our GPs, staff and associated practitioners are committed to protecting your privacy and will only process data in accordance with the Data Protection Legislation. This includes the General Data Protection Regulation (EU) 2016/679 (GDPR) now known as the UK GDPR, the Data Protection Act (DPA) 2018, the Law Enforcement Directive (Directive (EU) 2016/680) (LED) and any applicable national Laws implementing them as amended from time to time. The legislation requires us to process personal data only if there is a legitimate basis for doing so and that any processing must be fair and lawful.

In addition, consideration will also be given to all applicable Law concerning privacy, confidentiality, the processing and sharing of personal data including the Human Rights Act 1998, the Health and Social Care Act 2012 as amended by the Health and Social Care (Safety and Quality) Act 2015, the common law duty of confidentiality and the Privacy and Electronic Communications (EC Directive) Regulations.

Data we collect about you

The health care professionals who provide you with care maintain records about your health and any treatment or care you have received previously (e.g. from Hospitals, GP Surgeries, A&E, etc.). These records help to provide you with the best possible healthcare.

Records which this GP Practice will hold about you will include the following:

- Details about you, such as your address and next of kin
- Any contact the surgery has had with you, such as appointments, clinic visits, emergency appointments, etc.
- Notes and reports about your health
- Details about your treatment and care
- Results of investigations, such as laboratory tests, x-rays, etc.
- Relevant information from other health professionals, relatives or those who care for you

Records which this GP Practice will hold or share about you will include the following:

- Personal Data – means any information relating to an identified or identifiable natural person ('data subject'); an identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person.
- Special Categories of Personal Data – this term describes personal data revealing racial or ethnic origin, political opinions, religious or philosophical beliefs, or trade union membership, and the processing of genetic data, biometric data for the purpose of uniquely identifying a natural person, data concerning health or data concerning a natural person's sex life or sexual orientation.
- Confidential Patient Information – this term describes information or data relating to their health and other matters disclosed to another (e.g. patient to clinician) in circumstances where it is reasonable to expect that the information will be held in confidence. Including both information 'given in confidence' and 'that which is owed a duty of confidence'. As described in the Confidentiality: NHS code of Practice: Department of Health guidance on confidentiality 2003.
- Pseudonymised – The process of distinguishing individuals in a dataset by using a unique identifier which does not reveal their 'real world' identity.
- Anonymised – Data in a form that does not identify individuals and where identification through its combination with other data is not likely to take place
- Aggregated – Statistical data about several individuals that has been combined to show general trends or values without identifying individuals within the data.

How we keep your information confidential and safe

Everyone working for our organisation is subject to the Common Law Duty of Confidence. Information provided in confidence will only be used for the purposes advised with consent given by the patient, unless there are other circumstances covered by the law. The NHS Digital [Code of Practice on Confidential Information](#) applies to all NHS staff and they are required to protect your information, inform you of how your information will be used, and allow you to decide if and how your information can be shared. All our staff are expected to make sure information is kept confidential and receive regular training on how to do this.

The health records we use will be electronic, on paper or a mixture of both, and we use a combination of working practices and technology to ensure that your information is kept

confidential and secure. Your records are backed up securely in line with NHS standard procedures. We ensure that the information we hold is kept in secure locations, is protected by appropriate security and access is restricted to authorised personnel.

We also make sure external data processors that support us are legally and contractually bound to operate and prove security arrangements are in place where data that could or does identify a person are processed.

We are committed to protecting your privacy and will only use information collected lawfully in accordance with:

- Data Protection Legislation
- General Data Protection Regulation
- Human Rights Act
- Common Law Duty of Confidentiality
- NHS Codes of Confidentiality and Information Security
- Health and Social Care Act 2015
- And all applicable legislation
-

We maintain our duty of confidentiality to you at all times. We will only ever use or pass on information about you if we reasonably believe that others involved in your care have a genuine need for it. We will not disclose your information to any third party without your permission unless there are exceptional circumstances (such as a risk of serious harm to yourself or others) or where the law requires information to be passed on.

How we use your information

St Luke's surgery is one of many organisations working in the health and care system to improve care for patients.

Whenever you use a health or care service, such as attending Accident & Emergency or using Community Care services, important information about you is collected in a patient record for that service. Collecting this information helps to ensure you get the best possible care and treatment.

Whenever you use a health or care service, such as attending Accident & Emergency or using Community Care services, important information about you is collected in a patient record for that service. Collecting this information helps to ensure you get the best possible care and treatment.

The information collected about you when you use these services can also be used and provided to other organisations for purposes beyond your individual care, for instance to help with:

- improving the quality and standards of care provided by the service
- research into the development of new treatments and care pathways
- preventing illness and diseases
- monitoring safety
- planning services
- risk stratification
- Population Health Management

This may only take place when there is a clear legal basis to use this information. All these uses help to provide better health and care for you, your family and future generations. Confidential patient information about your health and care is only used like this where allowed by law or with consent.

Most of the time, anonymised data is used for research and planning so that you cannot be identified in which case your confidential patient information isn't needed.

You have a choice about whether you want your confidential patient information to be used in this way. If you are happy with this use of information you do not need to do anything. If you do choose to opt out your confidential patient information will still be used to support your individual care. To find out more or to register your choice to opt out, please visit www.nhs.uk/your-nhs-data-matters. On this web page you will:

- See what is meant by confidential patient information
- Find examples of when confidential patient information is used for individual care and examples of when it is used for purposes beyond individual care
- Find out more about the benefits of sharing data
- Understand more about who uses the data
- Find out how your data is protected
- Be able to access the system to view, set or change your opt-out setting
- Find the contact telephone number if you want to know any more or to set/change your opt-out by phone
- See the situations where the opt-out will not apply

You can also find out more about how patient information is used at:

<https://www.hra.nhs.uk/information-about-patients/> (which covers health and care research); and <https://understandingpatientdata.org.uk/what-you-need-know> (which covers how and why patient information is used, the safeguards and how decisions are made)

You can change your mind about your choice at any time.

Data being used or shared for purposes beyond individual care does not include your data being shared with insurance companies or used for marketing purposes and data would only be used in this way with your specific agreement.

Health and care organisations have until 2020 to put systems and processes in place so they can be compliant with the national data opt-out and apply your choice to any confidential patient information they use or share for purposes beyond your individual care. Our organisation is compliant with the national data opt-out policy

Third Party Care Providers

In order to deliver the best possible service, the practice will use carefully selected third party service providers. When we use a third party service provider to process data on our behalf, we will always have an appropriate agreement in place to ensure that they keep the data secure, that they do not use or share the information other than in accordance with our instructions and that they operate securely.

Examples of functions that may be carried out by third parties include companies that provide:

- IT services and support, including our clinical systems
- Systems which manage patient facing services (e.g. our website)
- Data hosting service providers

- Systems which facilitate appointment bookings, electronic prescription services,
- Document management service
-

Child Health Information

We wish to make sure that your child has the opportunity to have immunisations and health checks when they are due. We share information about childhood immunisations, the 6-8 week new baby check and breast-feeding status with Children and Family Health Surrey health visitors and school nurses, who provide the Child Health Information Service in Guildford on behalf of NHS England.

Clinical audit

Information will be used by the CCG for clinical audit to monitor the quality of the service provided to patients with long terms conditions. When required, information will be held centrally and used for statistical purposes (e.g. the National Diabetes Audit). When this happens, strict measures are taken to ensure that individual patients cannot be identified from the data.

Clinical Research

We get requests from organisations to use our information for research purposes – we will always ask your permission before releasing any information for this purpose.

Improving Diabetes Care

Information that does not identify individual patients is used to enable focussed discussions to take place at practice-led local diabetes review meetings between health care professionals. This enables the professionals to improve the management and support of these patients.

Individual Funding Request

An 'Individual Funding Request' is a request made on your behalf, with your consent, by a clinician, for funding of specialised healthcare which falls outside the range of services and treatments that CCG has agreed to commission for the local population. An Individual Funding Request is taken under consideration when a case can be set out by a patient's clinician that there are exceptional clinical circumstances which make the patient's case different from other patients with the same condition who are at the same stage of their disease, or when the request is for a treatment that is regarded as new or experimental and where there are no other similar patients who would benefit from this treatment. A detailed response, including the criteria considered in arriving at the decision, will be provided to the patient's clinician.

Invoice Validation

Invoice validation is an important process. It involves using your NHS number to identify which CCG is responsible for paying for your treatment. Section 251 of the NHS Act 2006 provides a statutory legal basis to process data for invoice validation purposes. We can also use your NHS number to check whether your care has been funded through specialist commissioning, which NHS England will pay for. The process makes sure that the organisations providing your care are paid correctly.

Local Information Sharing

Your GP electronic patient record is held securely and confidentially on an electronic system managed by your registered GP practice. If you require attention from a health professional such as

an Emergency Department, Minor Injury Unit or Out of Hours service, the professionals treating you are better able to give you safe and effective care if relevant information from your GP record is available to them.

Where available, this information can be shared electronically with other local health and care providers via a secure system designed for this purpose. Depending on the service you are using and your health and care needs, this may involve the professional accessing a secure system that enables them to view relevant parts of your GP electronic patient record (e.g. Connected Care or your Summary Care Record).

In all cases, your information is only accessed and used by authorised health and social care professionals Guildford and Waverley based organisations who are involved in providing or supporting your direct care. Your permission will be asked before the information is accessed, other than in exceptional circumstances (e.g. emergencies) if the healthcare professional is unable to ask you and this is deemed to be in your best interests (which will then be logged).

National Fraud Initiative – Cabinet Office

The use of data by the Cabinet Office for data matching is carried out with statutory authority under Part 6 of the Local Audit and Accountability Act 2014. It does not require the consent of the individuals concerned under Data Protection legislation. Data matching by the Cabinet Office is subject to a Code of Practice. For further information see:

<https://www.gov.uk/government/publications/code-of-data-matching-practice-for-national-fraud-initiative>

National Registries

National Registries (such as the Learning Disabilities Register) have statutory permission under Section 251 of the NHS Act 2006, to collect and hold service user identifiable information without the need to seek informed consent from each individual service user.

Risk Stratification

‘Risk stratification for case finding’ is a process for identifying and managing patients who have or may be at-risk of health conditions (such as diabetes) or who are most likely to need healthcare services (such as people with frailty). Risk stratification tools used in the NHS help determine a person’s risk of suffering a particular condition and enable us to focus on preventing ill health before it develops.

Information about you is collected from a number of sources including NHS Trusts, GP Federations and your GP Practice. A risk score is then arrived at through an analysis of your de-identified information. This can help us identify and offer you additional services to improve your health.

Risk-stratification data may also be used to improve local services and commission new services, where there is an identified need. In this area, risk stratification may be commissioned by the Guildford and Waverley CCG. Section 251 of the NHS Act 2006 provides a statutory legal basis to process data for risk stratification purposes. Further information about risk stratification is available from: <https://www.england.nhs.uk/ig/risk-stratification/>

If you do not wish information about you to be included in any risk stratification programmes, please let us know. We can add a code to your records that will stop your information from being used for this purpose. Please be aware that this may limit the ability of healthcare professionals to identify if you have or are at risk of developing certain serious health conditions.

Safeguarding

To ensure that adult and children's safeguarding matters are managed appropriately, access to identifiable information will be shared in circumstances where it's legally required for the safety of the individuals concerned.

Summary Care Record (SCR)

The NHS in England uses a national electronic record called the Summary Care Record (SCR) to support patient care. It contains key information from your GP record. Your SCR provides authorised healthcare staff with faster, secure access to essential information about you in an emergency or when you need unplanned care, where such information would otherwise be unavailable.

Summary Care Records are there to improve the safety and quality of your care. SCR core information comprises your allergies, adverse reactions and medications. An SCR with additional information can also include reason for medication, vaccinations, significant diagnoses / problems, significant procedures, anticipatory care information and end of life care information. Additional information can only be added to your SCR with your agreement.

Please be aware that if you choose to opt-out of SCR, NHS healthcare staff caring for you outside of this surgery may not be aware of your current medications, allergies you suffer from and any bad reactions to medicines you have had, in order to treat you safely in an emergency. Your records will stay as they are now with information being shared by letter, email, fax or phone. If you wish to opt-out of having an SCR please return a completed opt-out form to the practice.

Supporting Medicines Management

Guildford and Waverley operates pharmacist and prescribing advice services to support local GP practices with prescribing queries, which may require identifiable information to be shared. These pharmacists work with your usual GP to provide advice on medicines and prescribing queries, and review prescribing of medicines to ensure that it is appropriate for your needs, safe and cost-effective. Where specialist prescribing support is required, the CCG medicines optimisation team may order medications on behalf of your GP Practice to support your care.

Supporting Locally Commissioned Services

CCGs and Public Health Surrey County Council support GP practices by auditing anonymised and pseudonymised data to monitor locally commissioned services, measure prevalence and support data quality. The data does not include identifiable information and is used to support patient care and ensure providers are correctly paid for the services they provide.

CQC accessing records and GDPR

CQC has powers under the Health and Social Care Act 2008 to access and use information where we consider this is necessary for us to carry out our functions as a regulator. Where possible inspectors should explain why they are asking to look at certain records. They will consider any concerns and objections raised to them, and whether they can achieve CQC's purpose by accessing the records of someone else. However, CQC relies on its legal powers to access information rather than consent, therefore may use its powers to access records even in cases where objections have been raised. More detail on how we ensure compliance with data protection law (including GDPR) and our privacy statement is [available on our website: www.cqc.org.uk/about-us/our-policies/privacy-statement](http://www.cqc.org.uk/about-us/our-policies/privacy-statement).

As part of their own compliance with GDPR, providers' own privacy statements should inform people of CQC's powers to ensure their staff, people using services and their families are aware. It would be helpful for providers to include a link to CQC's privacy statement in their own. The ICO provides more information and resources on GDPR compliance and can be [contacted for advice: www.ico.org.uk/](#).

Data Retention

We manage patient records in line with the [Records Management NHS Code of Practice for Health and Social Care](#) which sets the required standards of practice in the management of records for those who work within or under contract to NHS organisations in England, based on current legal requirements and professional best practice.

Who are our partner organisations?

We may also have to share your information, subject to strict agreements on how it will be used, with the following organisations:

- NHS Trusts
- Specialist Trusts
- GP Federations
- Primary Care Networks
- Independent Contractors such as dentists, opticians, pharmacists
- Private Sector Providers
- Voluntary Sector Providers
- Ambulance Trusts
- Clinical Commissioning Groups
- Care Quality Commission (CQC)
- Social Care Services
- Local Authorities
- Education Services
- Fire and Rescue Services
- Police
- Phyllis Tuckwell Hospice
- Procure GP Federation
- RSCH Cedar Centre
- Extended Access
- NEC Software Solutions UK Limited
- Medicines Management Solutions Ltd
- Docman
- Optum Health
- Daisy Group
- Lexacom [Privacy Policy - Lexacom](#)
- Imperium Healthcare GlucoRx
- AccuRX [Accurx | Privacy Policy](#)
- Primary Care Support [Privacy policy – Primary Care Support](#)
- Appliance Prescription Management Service SHAPMS
- Healthtech1 for registrations [General Privacy Policy](#)
- CHIS - South, Central and West Child Health Information Services (SCW CHIS) is commissioned by NHS England to support the monitoring of care delivered to children. Personal data is collected from the child's GP record to enable health screening, physical examination and vaccination services to be monitored to ensure that every child has access to all relevant health interventions. Apollo Medical Software Solutions. Used to

extract the data for GP clinical Systems. [Privacy and Cookies - SCW Child Health Information Service \(CHIS\)](#)

- Other 'data processors'
- Open SAFELY Data Analytics Service

"NHS England has been directed by the government to establish and operate the OpenSAFELY COVID-19 Service and the OpenSAFELY Data Analytics Service. These services provide a secure environment that supports research, clinical audit, service evaluation and health surveillance for COVID-19 and other purposes.

"Each GP practice remains the controller of its own GP patient data but is required to let approved users run queries on pseudonymised patient data. This means identifiers are removed and replaced with a pseudonym.

"Only approved users are allowed to run these queries, and they will not be able to access information that directly or indirectly identifies individuals.

"Patients who do not wish for their data to be used as part of this process can register a type 1 opt out with their GP.

You can find additional information about OpenSAFELY at <https://www.opensafely.org/>

We will never share your information outside of health partner organisations without your explicit consent unless there are exceptional circumstances such as when the health or safety of others is at risk, where the law requires it or to carry out a statutory function.

Within the health partner organisations (NHS and Specialist Trusts) and in relation to the above mentioned themes – Risk Stratification, Invoice Validation, Supporting Medicines Management, Summary Care Record – we will assume you are happy for your information to be shared unless you choose to opt-out (see below).

This means you will need to express an explicit wish to not have your information shared with the other organisations; otherwise it will be automatically shared. We are required by law to report certain information to the appropriate authorities. This is only provided after formal permission has been given by a qualified health professional. There are occasions when we must pass on information, such as notification of new births, where we encounter infectious diseases which may endanger the safety of others, such as meningitis or measles (but not HIV/AIDS), and where a formal court order has been issued. Our guiding principle is that we are holding your records in strictest confidence.

How long do we hold information for?

All records held by the Practice will be kept for the duration specified by national guidance from [NHS Digital, Health and Social Care Records Code of Practice](#). Once information that we hold has been identified for destruction it will be disposed of in the most appropriate way for the type of information it is. Personal confidential and commercially confidential information will be disposed of by approved and secure confidential waste procedures. We keep a record of retention schedules within our

information asset registers, in line with the Records Management Code of Practice for Health and Social Care 2021.

Individuals Rights under UK GDPR

Under UK GDPR 2016 the Law provides the following rights for individuals. The NHS upholds these rights in a number of ways.

1. The right to be informed
2. The right of access
3. The right to rectification
4. The right to erasure (not an absolute right) only applies in certain circumstances
5. The right to restrict processing
6. The right to data portability
7. The right to object
8. Rights in relation to automated decision making and profiling.

Your right to opt out of data sharing and processing

The NHS Constitution states 'You have a right to request that your personal and confidential information is not used beyond your own care and treatment and to have your objections considered'.

Type 1 Opt Out

This is an objection that prevents an individual's personal confidential information from being shared outside of their general practice except when it is being used for the purposes of their individual direct care, or in particular circumstances required by law, such as a public health emergency like an outbreak of a pandemic disease. If patients wish to apply a Type 1 Opt Out to their record they should make their wishes known by contacting Reception.

National data opt-out

The national data opt-out was introduced on 25 May 2018, enabling patients to opt-out from the use of their data for research or planning purposes, in line with the recommendations of the National Data Guardian in her Review of Data Security, Consent and Opt-Outs.

The national data opt-out replaces the previous 'type 2' opt-out, which required NHS Digital not to use a patient's confidential patient information for purposes beyond their individual care. Any patient that had a type 2 opt-out recorded on or before 11 October 2018 has had it automatically converted to a national data opt-out. Those aged 13 or over were sent a letter giving them more information and a leaflet explaining the national data opt-out. For more information go to [National data opt out programme](#)

To find out more or to register your choice to opt out, please visit www.nhs.uk/your-nhs-data-matters.

On this web page you will:

- See what is meant by confidential patient information
- Find examples of when confidential patient information is used for individual care and examples of when it is used for purposes beyond individual care
- Find out more about the benefits of sharing data
- Understand more about who uses the data
- Find out how your data is protected
- Be able to access the system to view, set or change your opt-out setting

- Find the contact telephone number if you want to know any more or to set/change your opt-out by phone
- See the situations where the opt-out will not apply

Right of Access to your information (Subject Access Request)

Under Data Protection Legislation everybody has the right have access to, or request a copy of, information we hold that can identify them, this includes medical records. There are some safeguards regarding what patients will have access to and they may find information has been redacted or removed for the following reasons;

- It may be deemed to risk causing harm to the patient or others
- The information within the record may relate to third parties who are entitled to their confidentiality, or who have not given their permission for the information to be shared.

Patients do not need to give a reason to see their data. And requests can be made verbally or in writing. Although we may ask them to complete a form in order that we can ensure that they have the correct information required.

Where multiple copies of the same information is requested the surgery may charge a reasonable fee for the additional copies.

Patients will need to provide proof of identity to receive this information.

Patients may also request to have online access to their data, they may do this via the [NHS APP](#), or via the practices system. If you would like to access your GP record online click here www.stlukessurgeryguildford@nhs.uk

Change of Detail

It is important that you tell the surgery if any of your contact details such as your name or address have changed, or if any of your other contacts details are incorrect including third party emergency contact details. It is important that we are made aware of any changes **immediately** in order that no information is shared in error.

Mobile telephone number

If you provide us with your mobile phone number, we will use this to send you text reminders about your appointments or other health screening information. Please let us know if you do not wish to receive text reminders on your mobile.

Email address

Where you have provided us with your email address, with your consent we will use this to send you information relating to your health and the services we provide. If you do not wish to receive communications by email please let us know.

Notification

Data Protection Legislation requires organisations to register a notification with the Information Commissioner to describe the purposes for which they process personal and sensitive information.

We are registered as a Data Controller and our registration can be viewed online in the public register at: <http://ico.org.uk/what-we-cover/register-of-data-controllers>

Any changes to this notice will be published on our website and in a prominent area at the Practice.

What is the right to know?

The Freedom of Information Act 2000 (FOIA) gives people a general right of access to information held by or on behalf of public authorities, promoting a culture of openness and accountability across the public sector. You can request any non-personal information that the GP Practice holds, that does not fall under an exemption. You may not ask for information that is covered by the Data Protection Legislation under FOIA. However you can request this under a right of access request – see section above ‘Access to your information’.

Right to Complain

If you have concerns or are unhappy about any of our services, please contact the Practice Manager.

For independent advice about data protection, privacy and data-sharing issues, you can contact:

The Information Commissioner
Wycliffe House
Water Lane
Wilmslow
Cheshire
SK9 5AF

Phone: 0303 123 1113 Website: <https://ico.org.uk/global/contact-us>

The NHS Care Record Guarantee

The NHS Care Record Guarantee for England sets out the rules that govern how patient information is used in the NHS, what control the patient can have over this, the rights individuals have to request copies of their data and how data is protected under Data Protection Legislation. A copy of the NHS Care Record Guarantee can be downloaded [here](#)

The NHS Constitution

The NHS Constitution establishes the principles and values of the NHS in England. It sets out the rights patients, the public and staff are entitled to. These rights cover how patients access health services, the quality of care you'll receive, the treatments and programs available to you, confidentiality, information and your right to complain if things go wrong.

<https://www.gov.uk/government/publications/the-nhs-constitution-for-england>

NHS Digital

NHS Digital collects health information from the records health and social care providers keep about the care and treatment they give, to promote health or support improvements in the delivery of care services in England.

<https://digital.nhs.uk/about-nhs-digital/our-work/keeping-patient-data-safe/how-we-look-after-your-health-and-care-information/understanding-the-health-and-care-information-we-collect>

If you wish to discuss or exercise any of your rights, please contact the Practice directly in the first instance:

St Luke's Surgery
Warren Road
Guildford
GU1 3JH
01483 510030

Alternatively, the Practice's Data Protection Officer can be contacted directly:

- Name: Daniel Lo Russo
- Email address: syheartlandsicb.informationgovernance@nhs.net
- Telephone: 07811 355 274
- Address: Surrey Heartlands, Block C, 1st Floor, Dukes Court, Duke Street, Woking, Surrey, GU21 5BH

You have the right to complain to the Information Commissioner's Office, you can use this link <https://ico.org.uk/global/contact-us/>

or calling their helpline Tel: 0303 123 1113 (local rate) or 01625 545 745 (national rate)

There are National Offices for Scotland, Northern Ireland and Wales, (see ICO website)

Reviews of and Changes to our Privacy Notice

We will keep our Privacy Notice under regular review. This notice was last reviewed in May 2024

Lawful basis for processing:

The processing of personal data in the delivery of direct care and for providers' administrative purposes in this surgery and in support of direct care elsewhere is supported under the following Article 6 and 9 conditions of the GDPR:

- Article 6(1)(e) '...necessary for the performance of a task carried out in the public interest or in the exercise of official authority...'; and
- Article 9(2)(h) 'necessary for the purposes of preventative or occupational medicine for the assessment of the working capacity of the employee, medical diagnosis, the provision of health or social care or treatment or the management of health or social care systems and services...'
